DETAILED ACTION

Claim Rejections - 35 USC § 103

1. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

2. Claims 1-2 and 28-29 are rejected under 35 U.S.C. 103(a) as being unpatentable over Nakano (US 5,706,125 published Jan. 6, 1998) in view of Manzur (US .

Nakano discloses an optical amplifying circuit (fig. 4, #11) that operates according to the following method:

- detecting a tone at the input of an amplifier (#9) and a crosstalk cancellation unit (#2);
- converting the detected tone into an electrical signal (#9 is a photodiode);
- analyzing the detected tone (#10);
- generating destructive tones to filter gain peaks (#2 is an interferometer);

However, Nakano does not specifically disclose detecting a tone at the output of the amplifier. Manzur teaches detection of both input and output tones to an optical amplifier (fig. 3, #12A and #12B). It would have been obvious to one of ordinary skill in the art (e.g., an optical engineer) to detect tones at both the input and the output of the amplifier for the advantage of measuring deleterious tones resulting from signal transmission through the optical amplifier.

Allowable Subject Matter

3. Claims 3-27 and 30-50 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.

4. The following is a statement of reasons for the indication of allowable subject matter.

With regard to claim 3 and the corresponding apparatus claim 30, the prior art does not teach or make obvious *generating cross-talk cancellation tones by the PCU* in conjunction with the other features the claim.

Information Disclosure Statement

5. The information disclosure statement (IDS) filed on March 11, 2004 has been considered by the examiner and is found to be cumulative to the art of record.

Conclusion

6. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. Bellotti, Blumenthal, and Rhee disclose means of compensating for cross-talk.

7. Any inquiry concerning this communication or earlier communications from the examiner should be directed to Deandra M Hughes whose telephone number is 571-272-6982. The examiner can normally be reached on M-F, 8:30am-5:00pm.
